

Self adhesive black EPDM joint tape used in façade and substructure applications.

It reduces noise, isolates dissimilar metals from each other and acts as a thermal break in façade systems. The high tack adhesive film applied at the factory makes installation easier. The EPDM tape significantly exceeds the requirements of DIN 18516 Part 1 regarding limit temperature fluctuations .

Description	EPDM Isolating tape, 70mm self adhesive
Product Group	Façade profiles / joint structure
Product Category	Joint tapes
Material	EPDM
Material thickness	0.75mm
Reaction to Fire	E
Length	2500cm
Package	3 pieces

Advantages:

- Good product isolating properties
- U.V Resistant
- Flexible and easy to install
- Waterproof
- Sound reducing properties
- Acts as a thermal break
